-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a process of fixing a tissue comprising elastin with a phenolic tannin, classified in class 435, subclass 377.
 - II. Claims 11-19, drawn to a process of forming a bioprosthesis, classified in class 600, subclass 36.
 - III. Claims 20-29, drawn to a fixed tissue, classified in class 435, subclass 395.
 - IV. Claims 30-40, drawn to a bioprosthesis comprising a fixed tissue and a support material, classified in class 623, subclass 2.14.
 - V. Claims 41-46, drawn to a process for replacing a damaged cardiac valve, classified in class 623, subclass 2.11.
2. Inventions I and III are related as process of making and product made. Also inventions II and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product made, namely the bioprosthesis or the fixed tissue could be made by a materially different process such as by providing a scaffold-less neocartilage.

3. Inventions I and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed could be used in a materially different method wherein the damaged valve is not removed or used in a different area as a vein.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II-V, restriction for examination purposes as indicated is proper.

5. A telephone call was not made to the attorney of record to request an oral election to the above restriction requirement because of the complexity of the five part restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Preeti Kumar whose telephone number is 571-272-1320. The examiner can normally be reached on M-F 9:00am - 5:30pm.
